Coronavirus facts and information sources

How serious is the coronavirus?

- It can be as bad as any other respiratory virus, such as the flu.
- The infection may be serious for some people, especially the elderly.
- There is no specific medicine.
- Most people get better after coughing and sneezing.

How likely are you to catch the virus?

- You can only catch it if you have been close to someone who has the virus.
- The chance of being infected with the virus is very low in the UK.
- If you have travelled to areas where many people are infected, your chance of catching the virus is higher.

How can you stop coronaviruses spreading?

If you need to cough or sneeze:

- Catch with a tissue
- Use the elbow
- Wash by washing your hands with soap & water or hand sanitizer

You should wash hands with soap & water or hand sanitizer:

- After travel & sport activities
- Before eating or drinking
- On arrival at any childcare or education setting
- After using the toilet
- Before leaving home

Try not to touch your eyes, nose and mouth with unwashed hands. Do not share items that come in contact with your mouth such as cups & bottles. If you do not share items such as bedding, dishes, pens & towels.

HELP STOP THE SPREAD OF VIRUSES

CATCH IT 
 Cover your mouth and nose with tissue or sleeve (not hands) when you cough or sneeze.

DISPOSE IT 
 Germs can live for several hours on tissues. Dispose of your tissue immediately.

KILL IT 
 Wash your hands with soap and water often - use hand sanitiser gel if soap and water are not available.

Symptoms of Coronavirus
A cough / A high temperature / Shortness of breath
 These symptoms do not necessarily mean you have the illness. The symptoms are similar to other illnesses that are much more common, such as cold and flu.
